

**Worksheet 58 · Units of length (cm, m)**

Choose the unit that makes the most sense for each object.

**#1** Which unit would probably be used to measure how long a desk is?

- 
- A Meters**
- 
- B Centimeters**

**#2** Which unit would probably be used to measure how long a playground is?

- 
- A Meters**
- 
- B Centimeters**

**#3** Which unit would probably be used to measure how long a textbook is?

- 
- A Meters**
- 
- B Centimeters**

**#4** Which unit would probably be used to measure how tall a building is?

- 
- A Meters**
- 
- B Centimeters**

**#5** Which unit would probably be used to measure how long a thumb is?

- 
- A Meters**
- 
- B Centimeters**

**#6** Which unit would probably be used to measure how long a highway is?

- 
- A Meters**
- 
- B Centimeters**

**#7** Which unit would probably be used to measure how long a notebook is?

- 
- A Meters**
- 
- B Centimeters**

**#8** Which unit would probably be used to measure how long a basketball court is?

- 
- A Meters**
- 
- B Centimeters**

**#9** Which unit would probably be used to measure how long a wire is?

- 
- A Meters**
- 
- B Centimeters**

**#10** Which unit would probably be used to measure how long a river is?

- 
- A Meters**
- 
- B Centimeters**

**#11** Which unit would probably be used to measure how long a ruler is?

- 
- A Meters**
- 
- B Centimeters**

**#12** Which unit would probably be used to measure how long a mountain trail is?

- 
- A Meters**
- 
- B Centimeters**
